**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 8 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Montaner et al.

Montaner et al. discloses a fluid dispenser head associating with a fluid dispenser member, the head comprising a body 8 defining a fluid outlet channel, a nozzle defining a dispenser orifice, a cover 4 assembled on the body to mask the body at least in part, and a skirt as recited in claim 8 (see Fig. 1 enclosed herein). Regarding the cover being overmolded on the body, whether a product is patentable depends on whether it is known in the art or it is obvious, and is not governed by whether the process by which it is made is patentable. Regarding claim 3, overmolding the cover onto the nozzle would have been a matter of design choice since the device would still function properly with such an arrangement. Regarding claims 12 and 13, Montaner et al. disclose the structural limitations of the instant invention and the method of overmolding has already been discussed above.

3. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Montaner et al. in view of Andris.

Andris teaches a fluid dispenser head comprising a nozzle 4 that projects outwards from the head. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Montaner et al. by having the nozzle to project outwards from the peripheral surface as has been taught by Andris.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 10 recites the limitation "the peripheral surface (121)." There is insufficient antecedent basis for this limitation in the claim.
